

# Explanation of Session Codes

The first letter of the code designates the day of the session (Sunday=S, Monday=M, Tuesday=T etc.). The second element indicates the session series in that day (for instance, A would denote the first oral session in that day, B would be second oral session). There is a poster session consisting of the oral contributed presentations from the previous two oral sessions (for example, after oral sessions A and B each day there will be a poster session AB that will host the accompanying posters for each of the oral contributed presentations in the previous sessions). The number on the end of the code (separated from the session code with a period) signals the position of the talk within the session (first, second, third, etc.). For example, a presentation coded MA.4 indicates that this paper is being presented on Monday (M) in the first oral session (A) of the day, and the fourth paper (4) presented in that session.

## Online Access to Technical Digest

Full Technical Conference Attendees have both EARLY and FREE perpetual access to the digest papers through OSA Publishing's Digital Library.
